

Captain Randy Cramer

I asked Izzy (ET/Mars) about the Mufon Investigative File on Captain Randy Cramer (Nov 1987) Claim of being and Interstellar Soldier so as to protect Secret Human Colonies off planet.

Here is her **8-11-2019** statement: "None of this is true. They failed horribly. It was a mistake to have such a program. There is NO earth base on the moon". "This is disinformation meant to hide stolen taxpayer money from the public coffers". MKULTRA tech was used

(See history of Franz Anton Mesmer, Saint German, Louis Claude DE Saint Martin, Cagliostro, Sigmund Freud, Wilhelm Reich, and Edward Bernays on Wikipedia for background.). (also see Ingo Swann, Uri Geller, Magnetometer Psychokinesis tests, Dr. Russell Targ, Dr. Harold Puthoff, DARPA psychotronic psychic warfare program, and The Defense Intelligence Agency/SRI international STARGATE PROJECT on remote viewing programs -Wikipedia.)

The TR-3B is real but can not go into outer space. Only into earth orbit. The Black Hats abducted Randy Cramer and programmed him for disinformation purposes. At first when he was asleep, then later when he was awake with drugs and mind control tech. Why? No ET threat then no Black Program Funding! Moreover, global warming means the collapse of the earth's world wide economic system. Randy did not know he was subject to mesmerism and hypnosis while dreaming. He was being manipulated mentally. DARPA can not draft soldiers. However, private contractors are protected under trade secrecy law. They are above the law. Izzy also said that "Randy Cramer did go into low earth orbit" however.
